Plinko

Hypeloot is proud to introduce the first-ever 100.000x Plinko multiplier game, whilst this is not only the most popular Plinko level, it is also a great marketing tool to advertise a high multiplier on our game mode. Our competitors usually cap the multiplier at 1000x, however, Hypeloot is known for innovating and adding a fresh touch to new games making this one of the most popular and most played game modes up to date on Hypeloot.com. The rules are straight forward, you choose a level, place a bet and win the multiplier on which the ball lands on.

Crash

The Crash Game is a phenomenon gaining massive popularity in recent years and introduces a simple yet exciting set of rules. Players choose a bet and set a winning goal, creating a dynamic where strategic decisions influence the outcome. The 1% chance of the graph crashing at 1.00x injects an element of unpredictability, keeping players on the edge of their seats. With a house edge of only 1%, the Crash Game at Hypeloot delivers an enticing proposition for players looking for a fair and exciting betting experience.

The screenshot displays the Hypeloot Crash game interface. At the top left, there are tabs for 'Manual' and 'Auto'. Below these are controls for 'BET AMOUNT' (set to \$0) and 'AUTO CASHOUT' (set to 25.00). A 'PLAY' button is visible. The main area shows a rocket's trajectory on a graph with a current payout of 1.98x. The graph has a vertical axis from 1.00x to 3.00x and a horizontal axis from 2s to 10s. A rocket is shown flying upwards, with a blue line representing its path. The current payout is 1.98x, and the current multiplier is 2.04x. The graph shows a crash at 1.00x. Below the graph is a 'Leaderboard' section showing the 'Last 7 Days' of play. The leaderboard has two tabs: 'HIGHEST WINS' and 'LUCKIEST WINS'. The 'HIGHEST WINS' tab is selected, showing three entries:

Player	PAYOUT	WAGER	MULT

Hidden (6 days ago)	\$109,451.10	\$19,200.00	7.00x

Crazy Wheel

The Crazy wheel is the latest game to be introduced to Hypeloot and is quickly gaining popularity, with 5 different betting options (2x multiplier, 3x multiplier, 5x multiplier, 50x multiplier and 100x multiplier). The user places a bet (or several) on any given multiplier, and if the animation lands on it, the user gets their bet multiplied by the corresponding multiplier. The Crazy Wheel has a house edge of only 1%.
